

QuickAir™

The QuickAir™ Emergency Escape Breathing Apparatus (EEBA) is NIOSH approved for escape from atmospheres that have become immediately dangerous to life or health (IDLH). The QuickAir™ provides a constant supply of air at 40 liters per minute for 5 or 10-minutes of escape. A 5-minute high flow model that supplies air at 70 lpm is also available. The QuickAir™ can be donned quickly with minimal training, even in the dark. Pictograms that demonstrate how to don the unit serve as convenient reminders on the carrying bag. The QuickAir™ EEBA is user friendly for both left and right handed personnel and can be worn over either shoulder, across the chest or around the neck. The cylinder gauge is clearly visible for easy inspection.

The transparent, self-extinguishing hood will not fog and provides unlimited vision range. It will accommodate long hair, beards and eyeglass wearers.

The QuickAir™ is a rugged, durable unit designed for a long shelf life in extreme conditions. The highly-visible orange carrying bag is made of flexible PVC that resists flame, chemicals, mildew and ultraviolet rays. Hard plastic storage cases and wall hanging kits are available for each unit.
