

Why test portable gas detectors one by one, by one, by one, when you can test 4 at once?

Reduce testing time and gas usage with our portable or wall mountable SGC Dock.

You can keep testing your portable gas detectors one at a time or you can test them in no time when you use the ultra-reliable gas detectors from Gas Clip Technologies and our SGC Dock portable or wall mountable docking station.

**Test 4 units at a time,
up to 12 per minute.**

Our SGC Dock lets you bump test and calibrate 4 monitors at once for H₂S, CO and O₂. You can test up to 12 monitors in a minute, which saves time and reduces testing gas.

**Accurately test and record
all data for each monitor**

You name it and SGC Dock accurately tests, records and stores the information. It provides individual

monitor event logs, firmware, unit configurations and, of course, bump/calibration logs. The robust 4-GB USB gives you the memory you need and a lithium ion battery can perform hundreds of tests before it needs to be recharged.
